

# Thermoplastic Pre-Melting Kettles

Superior production capabilities

in a durable, skid-mounted, air-jacketed vertical design.

SINGLE  
SKID MOUNTED

SKID  
MOUNTED SET

TRAILER  
MOUNTED

TRUCK  
MOUNTED

## Features

- Thermostatically controlled, automatic electronic ignition system.
- High output propane or diesel fired kettle burners.
- Stainless steel lined burner compartment with SST deflector plate.
- Increased insulation for greater heat retention, increased burner fuel efficiency and minimal heat transfer to the kettle's external surfaces.
- Anti-splash material feed chute.
- Self-contained, load sensing, direct drive, hydraulically driven agitation system.
- "Auger" enhanced agitator shaft designed to minimize glass bead settlement.
- Propane or diesel fueled power units with electric start and 12 volt battery with case to power hydraulics.
- Internal plug type or knife gate type material dispensing valves.
- Removable feed step assembly with side handrails.
- Hydraulic reservoir and diesel fuel tank (if applicable) mounted on skid under feed step assembly.
- Forklift fork-channels built into skid platform.
- Extensive, industry leading service and parts support available from MRL's experienced staff.
- Comprehensive parts and service manual.

## Single or Dual Models Available

500 / 1000 / 1500 / 2000 / 3000 and 4000 pound capacities.

### Power Unit Options:

- Propane fueled 20 hp.
- Diesel fueled 21 hp or 32 hp.

### Additional Options:

- Separate "power paks" containing diesel power unit, hydraulic pump, hydraulic reservoir, diesel fuel tank and 12 volt battery. Designed to mount under truck or trailer bed.
- Interconnection of kettles.
- Custom paint per customer specification.
